

A Model of Participatory Decision Making for Water Resources

Step 1: Develop Water Budget

- 1a: Current regional water budget
- 1b: Distribution of water demand and supply in space and time

Step 2: Discuss Concerns

- 2a: Brainstorm concerns
- 2b: Review summaries

Step 3: Simulate Demand and Supply

- 3a: Identify water demand and supply drivers
- 3b: Develop alternative futures for water demand and supply

Step 4: Create water supply packages

- 4a: Discuss projects
- 4b: Discuss funding options
- 4c: Create your own package

Step 5: Select a package for recommendation

- 5a: Discuss candidate packages
- 5b: Vote on package recommendation

Step 6: Prepare stakeholder report

- 6a: Discuss report
- 6b: Vote on report endorsement
