

**2014 Global Classroom:  
Building Resilient Cities**  
June 3 - August 29

## Global Energy Network Institute

1088 Third Avenue, San Diego, California

Dear Friend & Supporter,

The Global Energy Network Institute (GENI) will be hosting our **3rd Annual Global Classroom** at the World Resource Simulation Center.

GENI is a nonprofit organization that conducts research into the development of electric grids between nations and continents with an emphasis on tapping abundant renewable energy resources.

This year we are delving into the challenges required to make cities more resilient and sustainable. With our Global Classroom of international and local college students, we will address these issues by assessing the risks within each of the sub-systems: economic, social, environmental and the built environment; and innovations being developed to combat these challenges.

This 12-week program will be attended by government representatives, engineering officials, environmental consultants, university staff, and community leaders.

The 2014 Global Classroom is enhanced by your support to fund our 24 international and local students, plus 12 detailed presentations. Subject matter experts will co-lead the program each week, preparing our students for the future workforce.

Participation in the Global Classroom is an opportunity for recognition and awareness from institutions across Southern California. Included in this Packet is a 'Sponsorship Benefits Page' and 'Sponsor Information Form'. Please consider an appropriate level for your company.

If you have any questions or comments, please feel free to contact us at (619) 595-0139 or via email at [peter@geni.org](mailto:peter@geni.org)

We look forward to your support this summer.

Sincerely,  
Peter Meisen  
Director
